Our Beta Test Plan is focused on ensuring that your product is tested in the environment in which it will be used by QA Engineers who simulate the end user in your target market.

BETA TESTING

SQA Solution offers comprehensive pre-release software, application, and gaming beta testing services to ensure that your software product is fully functional and defect-free before your product goes to market. SQA Solution QA experts will go through your application and use it just as your intended audience would.

We use an innovative way of doing software quality assurance called Exploratory Testing. Our QA experts participate in testing sessions and perform unscripted testing. Experience has confirmed that our unscripted testing uncovers hidden bugs previously missed by other QA teams. Our QA engineers not only report bugs, they also provide valuable feedback on the competitive quality of your product.

DELIVERING RESULTS

Our Beta Testing test lead will review your business requirements, use cases, and application to identify testing scope utilizing our TCoE process and methodology. Our Beta Test Plan is focused on ensuring that your product is tested in the environment in which it will be used by QA Engineers who simulate the end user in your target market. Testing will be performed in our state-of-the-art QA lab and on all major platforms, including Windows, Linux, Macintosh, iPhone,

- **Increase Application Quality**
- **Accelerate Time-to-Market**
- **Minimize Testing Costs**

iPad, Blackberry, Palm, and more. Our consultants work with your project team on timeliness and QA metrics. They provide daily test status reports that review tests coverage and defects.
