SQA Solution has a strong team of experienced desktop application testers providing a full range of testing services for desktop applications.

DESKTOP APPLICATION TESTING

Software companies often find themselves having to make difficult decisions between delivering on time or delivering with quality.

It's a constant juggle to balance between the two priorities. And, in addition, software companies developing desktop applications are faced with the challenge of working with a multitude of operating system versions, environments, and platforms. This often results in a decision to release applications that aren't ready for prime time.

PROVIDING EXPERTISE

It only takes one bug to impact your organization's application usage or revenue. This is why our Certified QA company and 50+ QA experts provide your organization with strategic and tactical solutions for testing desktop applications. SQA Solution can catch hidden bugs before you launch.

This gives your customers the best possible user experience. It also minimizes the impact to your bottom line by providing:

- **Increase Application Quality**
- **Accelerate Time-to-Market**
- **Minimize Testing Costs**

- **Proven testing methodology and processes.**
- **Leadership in test planning and execution.**
- **Effective reporting of quality and risks in the application.**
- **100% functional coverage based on the agreed-upon scope.**
