Through our powerful solutions, we help organizations to increase productivity and quality through benchmarks and best practices that are driven by our workflow in Quality Center.

HP QUALITY CENTER IMPLEMENTATION

HP's Quality Center is the industry leader for automated software testing and test management. Quality Center provides a single centralized repository for all of an application's quality assurance documentation throughout the project lifecycle. SQA Solution's engineers are the experts in implementing Quality Center in FDA, HIPAA- regulated environments. We bring experience in a number of application environments common to life sciences:

- Training
- Validation with e-Signature
- SAP, Oracle E-Business Suite (and other ERPs)
- Siebel (and other CRMs)
- HP's TestDirector for Quality Center
- Custom applications

BENEFITS

- Simple FDA audits with secure and easily accessible records.
- Support internal workflows for document review and change control.
- Manage all quality assurance documentation centrally.

- **Increase Application Quality**
- **Accelerate Time-to-Market**
- **Minimize Testing Costs**

Note: SQA Solution can also provide a turn-key validation project, including validation documentation as well as consulting services to execute the validation scripts.

How SQA Solution Can Help You

Want to learn more about how SQA Solution can help you to create and implement your organization's Quality Center strategies? **Contact Us** to get detailed information about what's included in our services.

VALIDATION PACKAGE

The Validation Package with e-Signature for Quality Center provides an efficient means for automating the management of the validation testing process within a regulated environment, and delivers all of the benefits of using Electronic Signatures. The implementation of the Validation Accelerator builds measurable efficiencies into the validation process and streamlines the supporting test activities through automated test management.

The Validation Package includes a services engagement to configure Quality Center for each organization's particular understanding of compliance practices, and to accommodate an organization's particular workflow in support of their specific validation testing process. The Validation Package for Quality Center includes:

- Client specific project template configuration, including workflow and eSignature implementation, validation documentation, and validation services.

- Computer System Validation process Integration, including adaptation of tools to existing client validation processes, development of supporting procedures (i.e. QC project implementation procedure), as well as training, maintenance, and support.

The Validation Accelerator leverages a comprehensive set of validation documents to accelerate the validation effort, including:

- Validation Master Plan
- Configuration Specification (CS)
- System Requirements Specification (SRS)
- Installation Qualification (IQ)
- Operational Qualification (OQ)
- Performance Qualification (PQ)
- SOP checklist
- Traceability Matrix
- Final Validation Report

We also provide solutions that incorporate project management, application configuration, and computer systems validation (CSV) for TrackWise implementations.
