

# rent testers

The demand for mobile applications continues to grow and, because of this, the need for testing partners in the mobile industry is becoming increasingly important.

## MOBILE TESTING

Unlike other testing, validation of mobile applications requires special testing tools and techniques. The wide variety of mobile technologies, platforms, and devices presents a challenge when developing efficient strategies to test mobile software.

While the programming of mobile devices remains similar to other development approaches, testing and validation can be a totally different animal. For sufficient validation, there's a need for software testing tools and processes that address mobile application quality and unique challenges. Whether a solution involves automated testing tools or manual validation, you'll need a solid strategy to release a competitive product that works on mobile platforms.

## PROVIDING EXPERTISE

Our mobile application test experts will help create an implementation test strategy leveraging our best practices and technologies. The strength of over a decade of software testing improvements, combined with a deep working knowledge of mobile applications, makes SQA Solution the clear leader applying cutting-edge test technologies and methodologies.

You can hire our experts to work on-site, augmenting your team, or as an outsourced model. Our team has technical skills, business knowledge, and extensive experience testing multiple devices, different internal hardware, operating systems, and carriers.

- Increase Application Quality
- Accelerate Time-to-Market
- Minimize Testing Costs

**Note:** Pay only for what you need. Minimize testing costs by leveraging SQA Solution's On-Demand delivery model.

## How SQA Solution Can Help You

Want to learn more about how SQA Solution can help you to create and implement your organization's Mobile Application test strategy?

## CREATING SOLUTIONS

SQA Solution's experienced resources can integrate with your team to seamlessly enhance results and shorten the project time of your mobile application project. We offer a full suite of tactical and strategic mobile application testing solutions and, depending on your specific needs, we will support your project with all or part of the validation effort. Our comprehensive mobile application testing services will give you confidence that your application will function as intended on different devices with varying screen sizes, resolutions, internal hardware, operating systems, and carriers. We can help you with any or all of the following mobile application testing efforts:

- |  |  |
