SQA Solution's approach to SAP Testing Services methods provides clients with solutions focused on generating results and improving performance.

## SAP TESTING

In the world of Agile technological development and constant exchange of information, organizations continue to move toward SAP solutions to streamline order-processing, financial, supply chain, and intranet and extranet systems. While a SAP system can integrate many disparate systems into a single efficient application, doing so introduces a new challenge: ensuring quality through integrated testing processes across multiple business units.

## OUR SAP TESTING SERVICES

SQA Solution's approach to SAP Testing Services methods provides clients with solutions focused on generating results and improving performance. This helps you with project delivery and ongoing maintenance release cycles. Our full lifecycle SAP Testing Services approach results in:

- **Increase SAP Quality** – Ensure higher-quality project deliverables with fewer missed requirements and defects.
- **Accelerate Delivery Timeline** – Reduce variances, both in development and test cycle timelines.
- **Control Testing Costs** – Increased traceability and clear audit trails by leveraging SQA Solution's On-Demand delivery models.

- **Increase Application Quality**
- **Accelerate Time-to-Market**
- **Minimize Testing Costs**

**Note: Our Team can also help you with the testing of integration legacy applications with SAP.**

## How SQA Solution Can Help You

Want to learn more about how SQA Solution can help you to create and implement your organization's SAP Testing test strategies?

**Contact Us** to get detailed information about what's included in our services.

## CREATING SOLUTIONS

SQA Solution can help your organization integrate and improve testing practices by centralizing Quality Assurance related activities. Our SAP Testing Services Center of Excellence (COE) leverages best practices focused on SAP's functional modules that support business processes, including the following:

- |  |  |
|--|--|
| 1.1 Security (BC - SEC)                                  | 1.13 Upgrade General (BC - UPG)  |
| 1.2 Application Link Enabling (ALE)                      | 1.14 Change and Transport System (BC - CTS)                            |
| 1.3 Remote Function Calls (RFC)                          | 1.15 Operating System Platform (BC - OP)                               |
| 1.4 Object Linking and Embedding (OLE)                   | 1.16 Database Interface, database platforms (BC - DB)                  |
| 1.5 Common Program Interface Communications (CPI-C)      | 1.17 Front End Services (BC - FES)                                     |
| 1.6 Electronic Data Interchange (EDI)                    | 1.18 ABAP Workbench (BC - DWB)   |
| 1.7 Customizing (BC-CUS)                                 | 1.19 Documentation and Translation Tools (BC - DOC)                    |
| 1.8 ABAP Programming and Runtime Environment (BC - ABA)  | 1.20 Controls and Control Framework (BC - CI)                          |
| 1.9 Client Server Technology (BC - CST)                  | 1.21 Business Management (BC - BMT)                                    |
| 1.10 Network Integration (BC - NET)                      | 1.22 Middleware (BC - MID)   |
| 1.11 Basis Services/ Communication Interfaces (BC - SRV) | 1.23 Computer Aided Test Tool (BC - CAT)                               |
| 1.12 Computing Center Management System (BC - CCM)       | 1.24 Ready to Run R/3 (BC - BRR)                                       |
|  | 1.25 Authorizations System Monitoring with CCMS Workload Alert Monitor |

We provide specialized SAP Testing Services to the SAP community utilizing best practices to develop, implement, and establish both manual and automated testing throughout the system lifecycle for SAP and non-SAP systems.
