SQA Solution can develop Web Test Strategies that bring your website or application to market faster and with fewer bugs.

WEB TESTING

Testing and launching web applications and websites is not a small effort. The constant addition of new browsers, plug-ins, third-party apps, and programming languages makes development and testing on the web increasingly complicated. Setting up web testing processes within continually evolving technologies is challenging, but it's critical to success when it comes to testing web applications. In addition to evolving web technologies, the number of users globally expands each day.

PROVIDING EXPERTISE

SQA Solution delivers complete software web testing services providing you the benefit of utilizing a combination of our testing, consulting and process improvement expertise at any project stage.

We have worked with many web technologies such as:

| | |
|---------------------------------|------------------------------|
| Flash Technology Testing | Ruby on Rails Testing |
| Flex Testing | J Query Testing |
| HTML5 Testing | Facebook App Testing |
| .NET Technology Testing | CSS3 |
| SOA Architecture Testing | AJAX Testing |
| XSL/XSLT, XPATH Testing | PHP Testing |
| Selenium Testing | Performance Testing |
| Load Testing | Stress Testing |

Our QA engineers design, implement, and perform automated functional/system, performance and load tests. They use existing and off-the-shelf tools (QTP, SilkTest, CompuWare), as well as QR Code lab equipment.

- **Increase Application Quality**
- **Accelerate Time-to-Market**
- **Minimize Testing Costs**

They also use open-source automation and testing tools such as Selenium, Selenium Grid, Grinder, JUnit, Python/Nose, eggPlant, and FlexUnit.

We work with the following, and more:

- PCs, MACs, and UNIX workstations and servers.
- Windows 98/ME/2000/NT/XP/Vista/7, MacOS X, and many varieties of UNIX.
- Versions of Netscape / Mozilla, Internet Explorer, Safari, and Google Chrome.

CREATING SOLUTIONS

SQA Solution can develop web test strategies that bring your website or application to market faster and with fewer bugs. Our web testing solutions are comprehensive and customized for your needs – where and when you need them the most. We'll help select and purchase testing tools; define performance targets and metrics; and tackle web test design, development, and execution.

- Black Box Testing
- White Box Testing
- Test Automation
- Load & Performance Testing
- Functional Testing
- UI Testing
- Beta Testing
- Database Testing
- Migration Testing
- Installation Testing
- Compatibility Testing
- Usability Testing
- System Integration Testing
- Exploratory Testing

How SQA Solution Can Help You

Want to learn more about how SQA Solution can help you to create and implement your organization's Web Testing and web application test strategies?

Contact Us to get detailed information about what's included in our services.

- **Increase Application Quality** – Test earlier, smarter, and faster by leveraging SQA Solution's experienced Web Application testing resources throughout your development cycle.
- **Accelerate Time-to-Market** – Find critical issues earlier, which prevents delays that are caused by issues normally found late in the cycle. Bugs detected and fixed early are less expensive, keeping your project quality up and costs down.
- **Minimize Testing Costs** – Pay only for what you need with our SQA Solution On-Demand delivery model.
