rent testers

Increase your application quality by using SQA Solution's experienced Functional Testing resources throughout your application development cycle.

FUNCTIONAL TESTING

Software applications are a critical aspect of keeping your day-to-day business operations running smoothly and efficiently. Software applications that don't function correctly put your business at risk, often resulting in costly fixes and reduced customer confidence.

SQA Solution tracks IT successes and failures by surveying over 13,000 software development projects over the course of a year. Our research identified that 51% of projects exceed budget, miss deadlines, and fail to deliver the right functionality to support their businesses. Flaws in software cost the U.S. economy $59.5 billion annually. Much of this can be avoided with quality testing procedures.

PROVIDING EXPERTISE

With resources in US, Ukraine, India, and Canada, SQA Solution's consultants provide Functional Testing expertise that can be hired on-site to augment your team or as an outsourced model. Our team has technical skills, business knowledge, and extensive experience testing multiple software applications for a wide range of industries.

- Increase Application Quality
- Accelerate Time-to-Market
- Minimize Testing Costs

Note: Pay only for what you need. Minimize testing costs by leveraging SQA Solution's On-Demand delivery model.

How SQA Solution Can Help You

Want to learn more about how SQA Solution can help you to create and implement your organization's Functional Testing strategy?

CREATING SOLUTIONS

If your application hasn't been tested by SQA Solution, you can't be sure if it's ready for launch. Our Quality Assurance services can be leveraged in multiple ways — from On-Demand to fully managed outsource solutions, depending on your needs. Here are a few ways we can assist with your next project:

- **Agile (SCRUM) Testing**
- **Crowdsource Testing**
- **Desktop Testing**
- **ETL Testing**
- **Facebook Testing**
- **Mobile app testing**
- **21 CFR Part 11**

- **On-Demand Testing**
- **QA Offshore Testing**
- **QA Outsourcing**
- **QA Staff Augmentation**
- **Reports Testing**
- **Web App Testing**

DELIVERING RESULTS

SQA Solution's functional test leads review your business requirements and use cases to identify test scope by utilizing our TCoE process and methodology. Our experts thoroughly test your software looking for bugs between requirements and functionality, validating data, user interfaces, and verifying compatibility with OS/Browsers. Our consultants work with your project team on timeliness and QA metrics. They provide you with daily test status reports that review tests coverage and defects.
